

CS 5000 — Deep Learning: Course Syllabus (Draft — Instructor Use Only)

1. Course Information

Department: Computer Science. Credits: 4. Term: Spring 2026 (pending approval). Instructor: Prof. A. Rossi. Status: DRAFT, not yet published to students.

2. Prerequisites

CS 4780 (Machine Learning) and STAT 3000 (Introduction to Statistics), or equivalent, each completed with a grade of B or better.

3. Course Description

Graduate-level treatment of deep learning: backpropagation, convolutional and recurrent architectures, transformers, and generative models. Draft topic list pending curriculum committee review.

4. Grading Policy (Draft)

Proposed: Homework 25%, Midterm 20%, Final Project 40%, Participation 15%. Not finalized; subject to change before publication.
