

# **STAT 3000 — Introduction to Statistics: Course Syllabus**

## **1. Course Information**

Department: Statistics. Credits: 3. Term: Fall 2025 and Spring 2026. Instructor: Prof. L. Chen.

## **2. Prerequisites**

None. This is an introductory course open to all undergraduates regardless of major or prior coursework. High-school algebra is assumed but no prior statistics or probability background is required.

## **3. Course Description**

Covers descriptive statistics, probability distributions, hypothesis testing, confidence intervals, and simple linear regression, with applications in R.

## **4. Grading Policy**

Homework 25%, Two Midterms 40%, Final Exam 35%.

## **5. Course Schedule**

Weeks 1-3: Descriptive statistics and probability. Weeks 4-6: Distributions and the Central Limit Theorem. Weeks 7-10: Hypothesis testing and confidence intervals. Weeks 11-14: Regression.
